

A function under the first British Concorde will be remembered for its prestige and unique setting.

Trade Shows - Wedding Receptions - Concerts
Dinner-Dances - Award Ceremonies

Concorde 002 is the first British prototype Concorde. It first took off from Filton, Bristol on April 9th 1969 and went on to make 439 flights. It was airborne for 723 hours and flew supersonically for 173 hours. Its last flight was made on March 4th 1976 when it was flown from Fairford to the Fleet Air Arm Museum at Yeovilton by the legendary test pilot Brian Trubshaw.

In addition to Concorde, the exhibition hall is home to other unique or rare aircraft including: the Fairey Delta 2, winner of the World Air Speed Record in 1956 and the first aircraft to fly at more than 1000mph; the Handley Page 115; Westland Wyvern and more.

Although large enough to house Concorde, the Hall can be dressed with a dance floor, staging and bar area to create a truly atmospheric environment to suit the occasion.

Wine and dine in style under the first British Concorde
