

Regularly in use by schools and colleges, the Learning Centre is a fully air conditioned large classroom with wall mounted photographic displays of Naval Aircrew and the aircraft they flew.

Workshops - Training sessions

It is a large, well lit airy room with two double entrance doors at each end of the room. The flooring is a polished durable hard wearing surface.

The room has the added advantage of a fully integrated, interactive white board with an enhanced audio system and WiFi access.

The inbuilt facilities include a retractable screen and ceiling suspended projector.

At the rear of the Learning Centre is a small training suite of 5 computers which are linked to an instructor's lead PC. The instructor can place documents and tasks onto the desktop of each of the computers and can lead a training session.
